

KENTON COUNTY TRANSPORTATION PLAN

LEADING TRANSPORTATION FROM FRONTIER TO FUTURE

The plan serves all of Kenton County!

WHAT IS THE KENTON COUNTY TRANSPORTATION PLAN?

Our Transportation Plan identifies and prioritizes transportation improvement projects across the county and helps guide planning and funding decisions at the county and state level. It also keeps the travel issues that matter most to Kenton Countians top of mind.

Safe and easy travel to and from home, work, and play is a cornerstone of a thriving community. Whether you’re putting the kids on the bus, driving to work, heading to church, or bicycling to your favorite park, we want to help you get where you want to go.

As we look ahead, we want to ensure that our local transportation systems meet the changing needs and interests of our community, no matter if you travel by car, by bus, on a bike, or even on foot.

We want to hear from you! Your thoughts about your daily commute, your neighborhood streets, and the roads you travel across the county will help us plan where we go from here and the best way to get there.

PLAN SCHEDULE

KENTON COUNTY TRANSPORTATION PLAN

LEADING TRANSPORTATION FROM FRONTIER TO FUTURE

GOAL AND OBJECTIVES

WHAT DO WE AIM TO ACCOMPLISH WITH THIS PLAN?

GOAL

To enhance and expand the effectiveness of the transportation system by promoting multimodal approaches that address the needs of all users.

OBJECTIVES

1. Promote increased roadway connectivity between activity nodes to reduce congestion on major thoroughfares.
2. Recognize the impact of freight on the transportation network and work towards more efficient movement of freight out of, into, and through the region.
3. Encourage strategic locations that support transit to enhance efficiency.
4. Increase the safety, convenience and efficiency of all modes of transportation.
5. Promote viable transportation options for all demographics.

The plan will be a countywide document that guides the planning and development of new capital transportation projects over the next several years. Through its publication and the planning process, it will communicate to residents, visitors, and stakeholders the existing transportation network, plans to enhance and improve the network, and to improve the overall quality of life for Kenton County residents.

EXISTING AND FUTURE LAND USE

EXISTING LAND USE

This is how land is being used today. Understanding land use helps us know how the transportation network is being used by various modes such as cars, freight trucks, pedestrians, bicyclists, and transit users.

FUTURE LAND USE

This is how land is projected to be used in the year 2040. We are planning for transportation networks that will fix today's problems and serve our community's needs in the future.

EXISTING CONDITIONS | Technical Analysis

CRASH DENSITY

These locations have the densest crash rates. Crashes are more likely to occur near interstate ramps and at intersections between major roadways.

FREIGHT NETWORK & FACILITIES

These are routes that heavy freight trucks, such as tractor trailers, should travel. Smaller trucks, such as delivery vehicles, travel on all roads.

BICYCLE, PEDESTRIAN, AND TRANSIT NETWORK

This is where infrastructure currently exists for bicyclists, pedestrians, and transit-users.

EXISTING CONDITIONS | Commuting Patterns

There are 41,630 people who work in Kenton County.
55% of workers with jobs in Kenton County also live in Kenton County,
but 45% of workers live outside of the county.

There are 82,346 people who live in Kenton County that are also employed.
28% of employed residents also work in Kenton County,
but 72% of employed residents work outside of the county.
